

## **BOMEX 2017 – Education Series**

### **Panelist**

#### **Adrien J. Deveau, M.A.Sc., P.Eng., Principal, Vice President, Energy Profiles Limited**

Adrien has been providing consulting services to building managers, developers and designers for nearly 20 years. He's been the Principal for hundreds of energy efficiency projects, including both new and existing buildings, with projects across the commercial, retail, residential and institutional sectors. Energy Profiles Limited provides custom Energy and Sustainability Data Management systems for an aggregate portfolio in excess of 5500 properties and \$850 million in annual utility costs. This includes real time data analytics and fault detection and diagnostics (FDD) using real time utility, submeter and BAS/BMS data.
