

BOMEX 2017 – Education Series

Panelist

Alex Foord, Vice President, Information Technology, BGIS

Alex Foord is the Vice President, Information Technology for BGIS. In this role, he oversees over 80 team members that provide a full-range of IT services within BGIS. Previously, Alex has managed large and complex technology footprints, and successfully implemented IT Governance processes that align with business leaders and strategy focused on annual multi-million dollar portfolio investments. Alex holds a Bachelor of Computer Science and has over 25 years of hands-on IT experience.

Alex's extensive executive experience has led to the maximization of IT value and business alignment, and the delivery of an International Corporate Real Estate Analytics Portal/Business Intelligence platform. His other successes include building and installing the first LAN-based point of sale (POS) system in Canada (as recognized in IBM's trade journal), software defect reduction and improvement of project delivery success.
